EXPERIENCE

Arithwise Solutions

Dec 2025 – Apr 2026

Software AI Developer Intern

Nagpur, Maharashtra

- Upgraded a full-stack AI platform integrating 4 core modules: professional networking, collaborative coding, structured learning, and gamified assessments in a single ecosystem.
- Created Loops, a real-time social networking module supporting 1:1 messaging, user connections, and interest-based public channels for community-driven interaction.
- Built a geolocation-based event discovery system supporting radius-based search and location tagging for 100+ events, improving event discoverability and user participation.

Avijo Healthcare

Apr 2025 – July 2025

Software Developer Intern

Remote

- **Ayushman Bharat Digital Health Portal (ABDM)**-aligned healthcare portal that can enable 10,000+ patient registrations and empower 1,000+ professionals, improving care delivery by 35%.
- Refactored backend architecture and developed 10+ REST APIs, models, and controllers for user and facility management, improving scalability and supporting cross-platform healthcare operations.

PROJECTS

AI Meeting Intelligence and RAG Assistant

- * Designed an AI-powered meeting assistant that transcribes English, Hindi, and Hinglish meetings from YouTube URLs, audio, and video files, generating structured summaries and insights.
- * Built a RAG-based conversational chatbot using LangChain, ChromaDB, and HuggingFace Embeddings, enabling users to query meeting transcripts through natural language interactions.
- * Automated extraction of action items, key decisions, open questions, and follow-ups, with support for exporting comprehensive meeting reports in PDF and TXT formats.
- * **Tech stack:** Python, LangChain LCEL, OpenAI Whisper, Sarvam AI, Mistral AI, ChromaDB, Hugging Face Embeddings, RAG, Streamlit.

Adaptive RAG : Agentic AI Chatbot (LangGraph Multi-Agent Framework)

- * Developed an adaptive Retrieval-Augmented Generation (RAG) system that dynamically routes queries to document retrieval, general LLM reasoning, or real-time web search for accurate, context-aware responses.
- * Planned a multi-agent workflow using LangGraph with ReAct-based reasoning, including query classification, retrieval, relevance grading, and answer generation agents.
- * Implemented semantic document search using Qdrant with intelligent chunking, embeddings, and query rewriting to improve retrieval precision and reduce hallucinations.
- * **Tech stack:** Python, LangGraph, FastAPI, Qdrant, MongoDB, OpenAI API, Streamlit, REST APIs

SKILLS

Tech Stack : Python, SQL, C, C++, HTML, CSS, JavaScript, React.js, Node.js, MongoDB, MySQL

AI/ML : Agentic Systems, AI Security, Generative AI Agents, Generative AI Model Architectures, LLM Application Development, Retrieval-Augmented Generation (RAG), Tool Calling

Tools : LangChain, LangGraph, OpenAI API, Vector Databases, Model Context Protocol (MCP), Prompt Engineering, Agentic Workflows, GitHub, Version Control, ETL, AWS

Other Skills : Communication, Teamwork, Leadership, Problem-Solving, Performance management

EDUCATION

Shri Guru Gobind Singh Ji Institute of Engineering and Technology

Nov 2022 – Apr 2026

Bachelor of Technology in Computer Science and Engineering
